PROFESSIONAL SUMMARY

Final-year AI & Data Science graduate (CGPA 8.49) with **7+ months of industry experience** building production-grade RAG systems, LLM pipelines, and multi-agent AI workflows. Delivered measurable results at BlackHole Infiverse — 5+ automation pipelines, ~65% reduction in manual effort — using LangChain, LangGraph, FastAPI, and PyTorch. Seeking a full-time **AI/ML Engineer** role to architect intelligent systems and drive product impact from day one.

EDUCATION

Vasantdada Patil Pratishthan's College of Engineering, Mumbai

2022 – 2026

B.E. in Artificial Intelligence and Data Science – CGPA: 8.49

EXPERIENCE

AI & ML Developer at BlackHole Infiverse Ltd. ↗

December 2024 – November 2025

Role - AI & ML Developer

Mumbai, Maharashtra

- **Architected a Prompt-to-Game Logic & World Building AI agent** in Python using LangChain that automated game-design workflows from natural-language prompts, cutting manual design effort by ~65% across 3 game genres.
- **Built and deployed 5+ multi-step LLM automation pipelines** using LangGraph and N8N, enabling intelligent task orchestration and replacing ~8 hours/week of manual processing.
- Integrated FAISS vector-search into RAG pipelines for semantic retrieval, improving answer relevance by ~40% over keyword-based methods in internal A/B testing.
- Prototyped 2 client-facing AI features end-to-end (prompt engineering → evaluation → API delivery), iterating through 3 review cycles to meet acceptance criteria.

AI & ML Intern at IBM-CSRBOX ↗

June 2024 – July 2024

Role - AI/ML Intern, Data Visualization

Remote

- **Trained and benchmarked 3 ML classification models** (Decision Tree, Random Forest, Logistic Regression) on a 10,000-row energy dataset; Random Forest achieved ~82% accuracy in predicting energy anomalies.
- Built an IBM Watson Assistant NLP chatbot delivering personalized energy-saving tips, reducing average user session time to under 90 seconds.
- Produced 8+ Seaborn/Matplotlib dashboards surfacing statistical insights; presented findings to a panel of 12 IBM mentors.
- Tools: Python, Watson Assistant, Pandas, NumPy, Seaborn, Scikit-learn.

PROJECTS

Camelot AI – RAG-Based Multi-Document Chatbot ↗ | Python, FastAPI, Flask, ChromaDB, HuggingFace, LangChain, JS

Feb 2026

- Designed end-to-end RAG pipeline: PDF ingestion → semantic chunking → sentence-transformer embeddings → ChromaDB vector store → LLM answer generation.
- Achieved 87% answer relevance rate (evaluated on 100 Q&A pairs) against a 50-page multi-document corpus with <3s average response latency.
- Deployed via FastAPI REST endpoint with a streaming vanilla-JS chat frontend supporting drag-and-drop multi-file upload.

Swar AI – Voice-Based AI Assistant App ↗ | Python, MERN, MySQL, FastAPI, Groq

June 2025 – Present

- Engineering a voice-first assistant automating 10+ task categories (WhatsApp messaging, web search, calling) via Python speech pipelines on a MERN backend.
- Achieved sub-200ms command classification latency using Groq-based inference; intent recognition accuracy >90% on a 200-sample personal test set.

Daily Money – AI-Powered Expense Tracker ↗ | React.js, Python, Flask, HTML, CSS

2025 – Present

- Built a React.js expense tracker with an embedded AI assistant that analyses 500+ real transactions and flags category-level overspend vs. 30-day rolling average.
- AI recommendations layer generates personalized budget nudges with <1s response time based on personal spending patterns.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C++ (basic)

AI / ML: LangChain, LangGraph, RAG, HuggingFace Transformers, PyTorch, TensorFlow, Scikit-learn, Watson Assistant, N8N

Data & Databases: Pandas, NumPy, Seaborn, Matplotlib, MySQL, MongoDB, ChromaDB, FAISS

Web & API: FastAPI, Flask, React.js, Node.js, Express.js, MERN Stack, Groq, Postman, REST API design

Developer Tools: Git, Docker (basic), VS Code, PyCharm, Jupyter Notebook

CERTIFICATIONS

- Postman API Fundamentals Expert – Postman
- Data Analytics: Noob to ProMax – End-to-end analytics certification
- NPTEL: Python for Data Science
- NPTEL: Database Management Systems
- NPTEL: Fundamentals of Artificial Intelligence
- NPTEL: Introduction to Machine Learning

EXTRACURRICULAR

- Technical Head, AI & DS Dept. Association (2024–25): led 20-student team, organised 10+ events attended by 100+ students.
- Technical Event Coordinator (Feb 2024): designed and ran a department tech fest with 50+ participants.
